ABOUT ME

In 2019 i discover web programming, then of that i never stop learn about related themes, now im search my first job. I have much desire to grow professionally

PERSONAL PROJECTS

GIF APPLICATION

Web application that uses the GIPHY public api, where you can search for gifs, add them to favorites, see your last search and more. It is developed with Reactjs. The objective was to learn more about custom hooks and the global state.

🔗 FakeGiphy 🔗 Repository

TODO APPLICATION

Web application made with Reactjs, where I create an api with Nodejs, express and mongoDB to be able to register users and do a CRUD of tasks. The objective was to learn the basics of backend development.

🔗 ToDo 🔗 Frontend 🔗 Backend
